

“Momma” :60 Second Commercial

MAMA: My son James and I were having a little talk about whether he should get the flu vaccine for his family. He said he heard the vaccine wasn't safe. I said if it was safe enough for millions of other people, it ought to be safe enough for him and his family. He said they're all healthy and they weren't planning on getting the flu. I told him nobody plans on getting sick, but they do. Thousands of healthy people miss time from work and school every year because of the flu.

You can't afford that. Think about it...if your kids get sick, they can't go to school. What if you get sick? You can't go to work. Besides, those are my grandbabies you're messing with! I didn't raise you like that. Listen to your momma.

Voiceover: Now is the time for you and your family to get vaccinated against the flu. Call your doctor or local health department.
