J. W. B.

Mr. Sam Morekas  
Head, Hazardous Waste Section  
Maryland State Dept. of Health  
201 West Preston Street  
Baltimore, MD 21201

Dear Mr. Morekas:

At several points during our past discussions on Swann Park, the arsenic content of soil came under review. Accordingly Allied Chemical has conducted a search of the available literature which reports arsenic content of various soils within the U. S. I am attaching copies of the literature. Basically, the data show arsenic contents of agricultural soil running from approximately 1 ppm to better than 100 ppm.

Very truly yours,
